

MBCD Multi Batch Cabinet Dryer

Static drying of several small seed lots together

Our Multi Batch Cabinet Dryer is a static dryer specially made to dry more than one sample at the same time. Because of the design of a closed cabinet there will be no airflow going into the working space, just connect an exhaust system to the dryer.

Two sliding doors in front of the machine gives you the access to the left part of the dryer, or the right part of the dryer. The airflow trough every tower of drying cylinders can be adjusted by the valves in front of every tower. The compact design gives you the opportunity to transport it trough normal office doors. And because of the flexibility and optional material cylinders you can dry up to 5 liters of seeds in one bin. This dryer is perfectly to dry several batches together.

Standard equipped with:

- Cabinet dryer for static drying of multiple product batches
- Closed cabinet with exhaust to prevent air flow into the working space
- 3 small adaption points for cylinders up to 3 liters
- 2 bigger adaption points for cylinders up to 5 liters
- Compact design, can be moved trough normal office doors
- PI controlled electrical heating system
- Flow trough each adaption point can be regulated with a valve
- Air inlet connection to feed outside or pre conditioned air

Options:

- Air conditioning unit to dry independent from ambient air conditions
- Extra material cylinders

Specification	MBCD
Dimensions	760mmx2000mmx1700mm
Power supply	3x400+N Vac 50Hz 8.5 kW (with electrical heating) 5 pin plug
Weight	Approx. 75kg
