

## Material Container Emptying Device

*“Emptying of the material container was never so easy!”*

Our FBM, FBOA and FBCRA dryers use our standard aluminum material container to dry the product. To ease the emptying out of the container we developed a standard lifting device. We can also deliver several standard mounting options, and special adapters to connect to your already used material containers. Please ask us for more details.

**Features :**

- Simple unloading system
- Several standard mounting options available (See pictures)
- Adapters available for connecting to already used containers.

Technical information	
Power	230Vac 50Hz 0.37kW
Weight	25kg
