

SC100/SC120 Seed Container

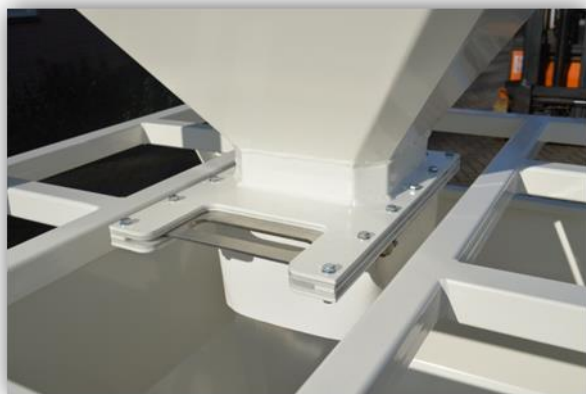

“Seed Container for internal transport, with no sharp corners”

The specially designed Hoopman seed containers are made without any sharp corners. Due to this design the seeds cannot get stuck in the container and a complete emptying is secured.

Two SC120 placed on each other

A special designed slide valve, which is easy to operate, is mounted to the bottom of the seed container. With this valve you can easily open/close the container. Even during the emptying.

Slide Valve
