

“Simple and easy drying of small seed lots”

The FB-Mobile is a low cost fluid-bed mini dryer specially made for small seed lots of 40-60L of seeds (depending on the process and species). The FB-Mobile is based on fluid-bed technique commonly used in the industry. The flexibility of the FBM is high because it is mounted on 4 swivel wheels and it is a plug and dry version. You can place it anywhere you want, connect it to a power supply and dry.

Product characteristics:

- Most efficient fluid bed system available in the industry
- Standard plug and dry version
- Easy to operate
- Simple straight forward design
- High flexibility, mounted on 4 swivel wheels, dry where you want
- Standard with 100 litres aluminium bucket
- Control box with:
 - PID controlled electrical heating system
 - Frequency controlled fan
 - Digital drying timer in HH:MM
- Standard with grey high quality finish
- CE-European industry standard

Options:

- Various sizes of holding bucket available (up to 200 litres)
- RH Upgrade with PLC control and logging
- 3-Box adapter to dry several smaller batches at once

Specifications

- Power supply : 8.5 kW (with integrated electrical heat system)
: 3x400 Vac 50Hz / 16A

Dimensions (FBM with 100 litre bucket)

- Length : 1220mm
- Width : 900mm
- Height : 1000mm
- Weight : approx. 100kg

Option: RH Upgrade with PLC control and logging

Option: 3-Box adapter
